

Question 22 continued.

• Example of JSON object

```
{  
  "name": "Proh Zindore",  
  "gender": "Female",  
  "age": 35,  
  "skills": ["Python", "SQL"],  
}
```

Question 23

Prompt engineering is the strategic designing and refining the instructions given to AI models. It involves structuring requests with clear context, tone specifications, defining constraints and giving examples to guide AI for it to produce highly accurate, relevant and useful responses.

• Prompt engineering is an important skill when working with AI agents because

- it eliminates generic output
- it controls format and length
- Improves accuracy

• Example of a poor prompt.

- Build me a website

• Example of a good prompt.

My name is Proh Zindore, I want you to build me a personal website that showcase my data analytics skills using Python and SQL. Add my attached
